---

*As a recent graduate in mechanical engineering, it is proven my analitical skills as well as versatility. Motivation and the challenge of continuous improvement has let me balance university studies and the learning of foreign languages (English and German).*

*I have been a high-performance futsal player, reaching the first Spanish futsal youth division due to my team spirit and perseverance*

*My experience as futsal referee for five years, has let me get used to work under pressure, make quick decisions and communicate with people in tense situations.*

*My passion for traveling has enhanced my organizational and communicative skills as well as my flexibility to get used to new and international environments.*

*I did a voluntary work in a non-profit organization named Asalvo for more than one year. There I was part of the logistic team and I deliver food for disadvantaged people, what developed in me a sense of commitment.*

*Finally, I have a deep interest in CFD, CAD and CAM thanks to the subjects I have study during the degree, and I would like to know more about this fields.*

---

## PROFESSIONAL EXPERIENCE

---

### **ARIA TECSYSTEMS — Valladolid, Spain**

*Main tasks: draft of technical reports, use of Office software (Word and Excel) and the conception of ideas for new projects.*

*My experience gained through this job has made me a more resolute and proactive person and has given me a general view of how to work in a more efficient way.*

**Position**, August 2020-October 2020

#### **Key Results:**

- ♦ Draft of four projects in the field of circular economy
- ♦ Draft of a project in the field of 3D scanners
- ♦ Increase in my creativity and solving problems capacity
- ♦ Increase in the tools of excel and word that I am capable to use
- ♦ First contact with the working world

---
